Operating Instructions
High Definition Video Camera

Model No. HDC-SD700
HDC-TM700
HDC-HS700

Before use, please read these instructions completely.

Please also refer to Operating Instructions (PDF format) recorded on the CD-ROM containing the Operating Instructions (supplied). You can learn about advanced operation methods and check the Troubleshooting.
Information for Your Safety

WARNING:
TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR PRODUCT DAMAGE,
• DO NOT EXPOSE THIS APPARATUS TO RAIN, MOISTURE, DRIPPING OR SPLASHING AND THAT NO OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHALL BE PLACED ON THE APPARATUS.
• USE ONLY THE RECOMMENDED ACCESSORIES.
• DO NOT REMOVE THE COVER (OR BACK); THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

CAUTION!
• DO NOT INSTALL OR PLACE THIS UNIT IN A BOOKCASE, BUILT-IN CABINET OR IN ANOTHER CONFINED SPACE. ENSURE THE UNIT IS WELL VENTILATED. TO PREVENT RISK OF ELECTRIC SHOCK OR FIRE HAZARD DUE TO OVERHEATING, ENSURE THAT CURTAIN AND ANY OTHER MATERIALS DO NOT OBSTRUCT THE VENTILATION VENTS.
• DO NOT OBSTRUCT THE UNIT’S VENTILATION OPENINGS WITH NEWSPAPERS, TABLECLOTHS, CURTAINS, AND SIMILAR ITEMS.
• DO NOT PLACE SOURCES OF NAKED FLAMES, SUCH AS LIGHTED CANDLES, ON THE UNIT.
• DISPOSE OF BATTERIES IN AN ENVIRONMENTALLY FRIENDLY MANNER.

The socket outlet shall be installed near the equipment and easily accessible.
The mains plug of the power supply cord shall remain readily operable.
To completely disconnect this apparatus from the AC Mains, disconnect the power supply cord plug from AC receptacle.

Concerning the battery

Warning
Risk of fire, explosion and burns. Do not disassemble.
Do not heat the batteries above the following temperatures or incinerate.
Button-type battery  60 °C
Battery pack  60 °C

CAUTION
Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer.
Dispose of used batteries according to the manufacturer’s instructions.

Warning
Keep the Button-Type battery out of the reach of children. Never put Button-Type battery in mouth. If swallowed call your doctor.

Button-type battery: CR2025
Use only the recommended accessories.
- Do not use any other AV multi cables and USB cables except the supplied one.
- When you use the cable which are sold separately, please make sure to use the one whose length is less than 3 metres.
- Keep the Memory Card out of reach of children to prevent swallowing.

Concerning the AC adaptor

Product Identification Marking is located on the bottom of unit.

How to replace the fuse
The location of the fuse differ according to the type of AC mains plug (figures A and B).
Confirm the AC mains plug fitted and follow the instructions below.
Illustrations may differ from actual AC mains plug.
1) Open the fuse cover with a screwdriver.

2) Replace the fuse and close or attach the fuse cover.

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union. If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.

Cautions for use
Keep the High Definition Video Camera as far away as possible from electromagnetic equipment (such as microwave ovens, TVs, video games etc.).
- If you use the High Definition Video Camera on top of or near a TV, the pictures and sound on the High Definition Video Camera may be disrupted by electromagnetic wave radiation.
- Do not use the High Definition Video Camera near cell phones because doing so may result in noise adversely affecting the pictures and sound.
- Recorded data may be damaged, or pictures may be distorted, by strong magnetic fields created by speakers or large motors.
- Electromagnetic wave radiation generated by microprocessors may adversely affect the High Definition Video Camera, disturbing the pictures and sound.
- If the High Definition Video Camera is adversely affected by electromagnetic equipment and stops functioning properly, turn the High Definition Video Camera off and remove the battery or disconnect AC adaptor. Then reinsert the battery or reconnect AC adaptor and turn the High Definition Video Camera on.
Do not use the High Definition Video Camera near radio transmitters or high-voltage lines.

- If you record near radio transmitters or high-voltage lines, the recorded pictures and sound may be adversely affected.

About connecting to a PC

- Do not use any other USB cables except the supplied one.

**Indemnity about recorded content**

Panasonic does not accept any responsibility for damages directly or indirectly due to any type of problems that result in loss of recording or edited content, and does not guarantee any content if recording or editing does not work properly. Likewise, the above also applies in a case where any type of repair is made to the unit (including any other non-built-in memory/HDD related component).

**Cards that you can use with this unit**

SD Memory Card, SDHC Memory Card and SDXC Memory Card

- 4 GB or more Memory Cards that do not have the SDHC logo or 48 GB or more Memory Cards that do not have the SDXC logo are not based on SD Memory Card Specifications.
- Refer to page 18 for more details on SD cards.

**For the purposes of these operating instructions**

- SD Memory Card, SDHC Memory Card and SDXC Memory Card are referred to as the “SD card”.
- Functions that can be used for motion picture recording/motion picture playback are indicated by [VIDEO] in these operating instructions.
- Functions that can be used for still picture recording/still picture playback are indicated by [PHOTO] in these operating instructions.

These operating instructions are designed for use with models [HDC-SD700], [HDC-TM700] and [HDC-HS700]. Pictures may be slightly different from the original.

- The illustrations used in these operating instructions show model [HDC-SD700], however, parts of the explanation refer to different models.
- Depending on the model, some functions are not available.
- Features may vary, so please read carefully.
- Not all models may be available depending on the region of purchase.

*1 The supplied DC cables cannot be used on this unit.
*2 The battery pack holder kit/VW-VH04 (optional) is necessary.
*3 When using the VW-WE08H, set the zoom to W (wide) side. The focus will be slightly out when it is set to T (tele) side, so remove the VW-WE08H when recording set to T (tele) side.
*4 When using the VW-LF46NE, remove the lens hood (supplied) and set to the flash setting to (OFF).
*5 External microphone may intrude into the frame when recording. Set the zoom to wide angle, and tilt the external microphone upward so it will not intrude into the frame. This will not affect the audio being recorded.
Parts identification and handling

[HDC-SD700]/[HDC-TM700]

1 Speaker
2 Power button [ijkstra] (→ 20)
3 Inlet (cooling fan)
4 Intelligent auto/Manual button [iA/MANUAL] (→ 27)

• Excessive sound pressure from earphones and headphones can cause hearing loss.
About batteries that you can use with this unit

The battery that can be used with this unit is VW-VBG130/VW-VBG260/VW-VBG6.
- This unit has a function to distinguish the batteries that can be used, and the batteries (VW-VBG130/VW-VBG260/VW-VBG6) are compatible with this function. (The batteries that are not compatible to this function cannot be used.)
- To use the VW-VBG6 for this unit, the battery pack holder kit VW-VH04 (optional) is required.

It has been found that counterfeit battery packs which look very similar to the genuine product are made available to purchase in some markets. Some of these battery packs are not adequately protected with internal protection to meet the requirements of appropriate safety standards. There is a possibility that these battery packs may lead to fire or explosion. Please be advised that we are not liable for any accident or failure occurring as a result of use of a counterfeit battery pack. To ensure that safe products are used we would recommend that a genuine Panasonic battery pack is used.

Charging the battery

When this unit is purchased, the battery is not charged. Charge the battery before using this unit.

Important:
If the DC cable is connected to the AC adaptor, then the battery will not charge. Remove the DC cable from the AC adaptor.

Charging lamp [CHARGE] A
Lights up: Charging (Battery charging time: ➔ 15)
Goes off: Charging completed
Flashing: Be sure to connect the unit correctly

1 Connect the AC cable to the AC adaptor and the AC outlet.
2 Insert the battery into the AC adaptor by aligning the arrows.
We recommend using Panasonic batteries. \(\Rightarrow 6, 15, 16\)
If you use other batteries, we cannot guarantee the quality of this product.
Do not heat or expose to flame.
Do not leave the battery(ies) in an automobile exposed to direct sunlight for a long period of time with doors and windows closed.

**Inserting/removing the battery**

Install the battery by inserting it in the direction shown in the figure.

**Removing the battery**
Be sure to hold down the power button until the status indicator goes off. Then remove the battery while supporting the unit to prevent it dropping.
Move the battery release lever in the direction indicated by the arrow and remove the battery when unlocked.

**CAUTION**
Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions.
### Charging and recording time

- **Charging/Recording time**
  - Temperature: 25 °C/humidity: 60%

</table>

* The battery pack holder kit VW-VH04 (optional) is necessary.
* These times are approximations.
* The indicated charging time is for when the battery has been discharged completely. Charging time and recordable time vary depending on the usage conditions such as high/low temperature.

- The actual recordable time refers to the recordable time when repeatedly starting/stopping recording, turning the unit on/off, moving the zoom lever etc.
- The batteries heat up after use or charging. This is not a malfunction.
The unit is in the standby condition when the AC adaptor is connected. The primary circuit is always “live” as long as the AC adaptor is connected to an electrical outlet.

Important:
While the DC cable is connected to the AC adaptor, the battery will not charge.
- Do not use the AC cable with any other equipment as it is designed only for this unit.
- Also, do not use the AC cable from other equipment with this unit.

1. Connect the AC cable to the AC adaptor and the AC outlet.
2. Connect the DC cable to the AC adaptor.
3. Connect the DC cable to the DC input terminal [DC IN].

- When removing the AC adaptor, be sure to hold down the power button until the status indicator goes off. Then remove the AC adaptor.

### Battery capacity indication
- The display changes as the battery capacity reduces.

If there is less than 3 minutes remaining, then \[ \text{will become red.} \]
If the battery discharges, then \[ \text{will flash.} \]
- The remaining battery capacity is displayed when using the Panasonic battery that you can use for this unit. The actual time can vary depending on your actual use.
- If the actual remaining time exceeds 9 hours 59 minutes, the indication will stay green and will not change until the remaining time falls below 9 hours 59 minutes.
- When using the AC adaptor or batteries made by other companies, the remaining battery capacity will not be shown.

### Connecting to the AC outlet
The unit is in the standby condition when the AC adaptor is connected. The primary circuit is always “live” as long as the AC adaptor is connected to an electrical outlet.

Important:
While the DC cable is connected to the AC adaptor, the battery will not charge.
- Do not use the AC cable with any other equipment as it is designed only for this unit.
- Also, do not use the AC cable from other equipment with this unit.

1. **Connect the AC cable to the AC adaptor and the AC outlet.**
2. **Connect the DC cable to the AC adaptor.**
3. **Connect the DC cable to the DC input terminal [DC IN].**

- When removing the AC adaptor, be sure to hold down the power button until the status indicator goes off. Then remove the AC adaptor.
Recording to a card

The unit can record still pictures or motion pictures to an SD card, built-in memory or HDD. To record to an SD card, read the following.

This unit (an SDXC compatible device) is compatible with SD Memory Cards, SDHC Memory Cards and SDXC Memory Cards. When using an SDHC memory card/SDXC memory card with other equipment, check the equipment is compatible with these memory cards.

### Cards that you can use with this unit

Use SD cards conforming to Class 4 or higher of the SD Speed Class Rating* for motion picture recording.

<table>

* The SD Speed Class Rating is the speed standard for successive writes.

- Please confirm the latest information about SD Memory Cards/SDHC Memory Cards/SDXC Memory Cards that can be used for motion picture recording on the following website.
  [http://panasonic.jp/support/global/cs/e_cam](http://panasonic.jp/support/global/cs/e_cam) (This website is in English only.)
- 4 GB or more Memory Cards that do not have the SDHC logo or 48 GB or more Memory Cards that do not have the SDXC logo are not based on SD Memory Card Specifications.
- When the write-protect switch on SD card is locked, no recording, deletion or editing will be possible on the card.
- Keep the Memory Card out of reach of children to prevent swallowing.
Inserting/removing an SD card

When using an SD card not from Panasonic, or one previously used on other equipment, for the first time on this unit, format the SD card. When the SD card is formatted, all of the recorded data is deleted. Once the data is deleted, it cannot be restored.

Caution:
Check that the access lamp has gone off.

**Access lamp [ACCESS]**
- When this unit is accessing the SD card or built-in memory, the access lamp lights up.

1. **Open the LCD monitor.**
2. **Open the SD card/terminal cover and insert (remove) the SD card into (from) the card slot.**
   - Face the label side B in the direction shown in the illustration and press it straight in as far as it will go.
   - Press the centre of the SD card and then pull it straight out.
3. **Securely close the SD card/terminal cover.**
   - Securely close it until it clicks.

- Do not touch the terminals on the back of the SD card.
- Do not apply strong shocks, bend, or drop the SD card.
- Electrical noise, static electricity or the failure of this unit or the SD card may damage or erase the data stored on the SD card.
- When the card access lamp is lit, do not:
  - Remove the SD card
  - Turn the unit off
  - Insert and remove the USB cable
  - Expose the unit to vibrations or shock
  - Performing the above while the lamp is on may result in damage to data/SD card or this unit.
- Do not expose the terminals of the SD card to water, garbage or dust.
- Do not place SD cards in the following areas:
  - In direct sunlight.
  - In very dusty or humid areas.
  - Near a heater.
  - Locations susceptible to significant difference in temperature (condensation can occur).
  - Where static electricity or electromagnetic waves occur.
- To protect SD cards, return them to their cases when you are not using them.
- Refer to the Operation Instructions (PDF format) about disposing of or giving away the SD card.
Turning the unit on/off

You can turn the power on and off using the power button, the LCD monitor or the viewfinder.

**Turning the power on and off with the power button**

Press the power button to turn on the power

\[ \text{The status indicator lights.} \]

To turn off the power

Hold down the power button until the status indicator goes off.

**Turning the power on and off with the LCD monitor/viewfinder**

Opening the LCD monitor or extending the viewfinder turns on the power. Closing the LCD monitor/viewfinder turns off the power.

During general use, you may find it convenient to turn the power on/off using the LCD monitor or viewfinder.

- **To turn on the power**
  - The status indicator lights.
  - The power will not turn off unless the LCD monitor is closed and the viewfinder is retracted.
  - The power will not turn off while recording motion pictures even if the LCD monitor is closed and the viewfinder is retracted.
  - In the following cases, opening the LCD monitor or extending the viewfinder does not turn on the power. Press the power button to turn on the power.
    - When the unit is purchased
    - When you have turned off the power using the power button

- **To turn off the power**
  - The status indicator goes off.
Selecting a mode

Change the mode to recording or playback.

**Operate the mode dial to change the mode to**, 🎥, 📸 or 🎥.

Align with the status indicator 🎥.

Setup

5

Adjusting LCD monitor/
viewfinder

How to use the touch screen

You can operate by directly touching the LCD monitor (touch screen) with your finger. It is easier to use the stylus pen (supplied) for detailed operation or if it is hard to operate with your fingers.

■ Touch

Touch and release the touch screen to select icon or picture.

- Touch the centre of the icon.
- Touching the touch screen will not operate while you are touching another part of the touch screen.

■ About the operation icons

△ / △ / ○ / ●:
These icons are used to switch the menu and thumbnail display page, for item selection and setting etc.

■:
Touch to return to the previous screen such as when setting menus.

- Do not touch the LCD monitor with hard pointed tips, such as ball point pens.
- Perform the touch screen calibration when the touch is not recognised or wrong location is recognised.

Viewfinder adjustment

■ Adjusting the field of view

It adjusts the field of view to show the images on the viewfinder clearly.

Adjust the focus by rotating the eyepiece corrector dial.

- Extend the viewfinder and close the LCD monitor to turn on the viewfinder.
Setting date and time

When the unit is turned on for the first time, a message asking you to set the date and time will appear. Select [YES] and perform steps 2 to 3 below to set the date and time.

1. Select the menu.

   ![Menu Option](image)
   
   **MENU**: [SETUP] → [CLOCK SET]

2. Touch the date or time to be set, then set the desired value using ▲/▼.

   ![Setting Date and Time](image)

   - Displaying the World time setting:
     - [HOME]/[DESTINATION]
     - The year can be set between 2000 and 2039.
     - The 24-hour system is used to display the time.

3. Touch [ENTER].

   - The clock function starts at [00] seconds.
   - A message prompting for World time setting may be displayed. Perform the World time setting by touching the screen.
   - Touch [EXIT] or press the MENU button to complete the setting.

- The date and time function is driven by a built-in lithium battery.
- When this unit is purchased, the clock is set. If the time display becomes [- -], the built-in lithium battery needs to be charged. To recharge the built-in lithium battery, connect the AC adaptor or attach the battery to this unit. Leave the unit as it is for approx. 24 hours and the battery will maintain the date and time for approx. 6 months. (The battery is still being recharged even if the power is off.)
Selecting a media to record [HDC-TM700/HDC-HS700]

The card, built-in memory, and HDD media can be selected separately to record motion pictures or still pictures.

1 Change the mode to [HDC-TM700] or [HDC-HS700].
2 Select the menu.

   MENU : [MEDIA SELECT]

3 Touch the media to record motion pictures or still pictures.

[HDC-TM700]

[HDC-HS700]

- The media is selected separately to motion pictures or still pictures is highlighted in yellow.

4 Touch [ENTER].
Recording motion pictures

1. Change the mode to .
2. Open the LCD monitor or extend the viewfinder.
3. Press the recording start/stop button to start recording.
4. Press the recording start/stop button again to pause recording.

- When you begin recording, changes to .
- Align with the status indicator .

Screen indications in the motion picture recording mode

- Recording mode
- Remaining time left for recording (When the remaining time is less than 1 minute, [R 0h00m] flashes red.)
- Recording time elapsed
  Each time the unit is put into recording pause, the counter display will be reset to “0h00m00s”.  

Recording still pictures

1. Change the mode to PHOTO.
2. Open the LCD monitor or extend the viewfinder.
3. Press the shutter button halfway. (For auto focus only)
4. Press the shutter button fully.

■ About the screen indications in still picture recording

- : Still picture operation indicator
  : Flash
  : Flash level
  : Red eye reduction
  : MEGA optical image stabilizer
  : Optical image stabilizer (p. 33)
  : Quality of still pictures
  : Size of still pictures
  : Remaining number of still pictures
  (Flashes in red when [0] appears.)
  : AF assist lamp
Basic Recording/Playback

4

Intelligent auto mode

The following modes appropriate for the condition are set just by pointing the unit to what you want to record.

### Intelligent auto/Manual button

Press this button to switch Intelligent auto mode/Manual mode.

</tbody>
</table>

*1 In motion picture recording mode only
*2 In still picture recording mode only

- Depending on the recording conditions, the unit may not enter the desired mode.
- In the portrait mode, one that is bigger and close to centre of the screen will be surrounded by an orange frame.
- It is recommended using a tripod in night portrait and night scenery mode.
- Optical image stabilizer function (33) is set to Active mode/ON in all modes.
- Faces cannot be detected depending on the recording conditions, such as when faces are of certain sizes or at certain tilts or when digital zoom is used.
- The microphone setup is set to surround in the Intelligent auto mode.
Motion picture/Still picture playback

1. Change the mode to  
2. Touch the play mode select icon B.
3. Touch the desired media to be played back motion pictures or still pictures.

HDC-SD700
- [VIDEO/SD CARD]
- [PICTURE/SD CARD]

HDC-TM700
- [VIDEO/SD CARD]
- [VIDEO/Built-inMemory]
- [PICTURE/SD CARD]
- [PICTURE/Built-inMemory]

HDC-HS700
- [VIDEO/SD CARD]
- [VIDEO/HDD]
- [PICTURE/SD CARD]
- [PICTURE/HDD]

Align with the status indicator A.
4 Touch the scene or the still picture to be played back.
   • Next (previous) page can be displayed by touching ▲/▼.

5 Select the playback operation by touching the operation icon.

<table>
<thead>
<tr>
<th>Operation icon</th>
<th>Touch ▲/▼ to display/not-display the operation icon.</th>
</tr>
</thead>
</table>

### Motion picture playback

- ▶/■: Playback/Pause
- ◀◀: Rewind playback
- ◀▶: Fast forward playback
- ▼: Stops the playback and shows the thumbnails.
- ▼: Displays the direct playback bar.

### Still picture playback

- ▶/■: Slide show (playback of the still pictures in numerical order) start/pause.
- ◀◀: Plays back the previous picture.
- ◀▶: Plays back the next picture.
- ▼: Stops the playback and shows the thumbnails.
Basic
Setup

1 Using the menu screen

1 Press the MENU button.

2 Touch the top menu A.

3 Touch the submenu B.

4 Touch the desired item to enter the setting.

5 Touch [EXIT] or press the MENU button to exit the menu setting.

About guide display
After touching , touching the submenus and items will cause function descriptions and settings confirmation messages to appear.

After the messages have been displayed, the guide display is cancelled.

Language selection
You can select the language on the screen display and the menu screen.

1 Press the MENU button, then touch [SETUP] → [LANGUAGE].

2 Touch [English].
Zoom in/out function

The maximum optical zoom ratio is 12×.
The default setting of the [ZOOM MODE] is [i.Zoom 18×]. It can be extended to a maximum of 18× during motion picture recording mode.

Change the mode to [ ] or [ ].

Zoom lever/Adjust zoom buttons

T side: Close-up recording (zoom in)
W side: Wide-angle recording (zoom out)

- The zoom speed varies depending on the range over which the zoom lever is moved.
- The adjust zoom buttons are useful for making fine adjustments to the zoom magnification.

Zoom mode

Set the maximum zoom ratio for the motion picture recording mode.

- Change the mode to [ ].

[Opt.Zoom 12×]: Optical zoom only (Up to 12×)
[i.Zoom 18×]: This zoom function allows you to maintain high-definition picture quality. (Up to 18×)
[D.Zoom 30×]: Digital zoom (Up to 30×)
[D.Zoom 700×]: Digital zoom (Up to 700×)

- The larger the digital zoom magnification, the more the image quality is degraded.
Zoom operation can be done using the multi manual ring.

**Zoom by rotating the ring.**

- **A side:** Close-up recording (zoom in)
- **B side:** Wide-angle recording (zoom out)

- The zoom speed varies depending on the speed to rotate the ring.

**Extra optical zoom**

If the number of the recording pixels is set to anything other than the maximum number of recording pixels in still picture recording mode, the still picture can be recorded with a zoom ratio of a maximum of 25× without degrading the picture quality.

- Extra optical zoom ratio varies depending on the setting of [PICTURE SIZE] and [ASPECT RATIO].

### Extra optical zoom mechanism

When you set the picture size to \( \frac{1}{8} \), the maximum \( \frac{1}{8} \) area is cropped to the centre \( \frac{1}{8} \) area, allowing a picture with a higher zoom effect.

- If you take your finger off the zoom lever during zoom operation, the operation sound may be recorded. When returning the zoom lever to the original position, move it quietly.
- When the zoom magnification is 12×, the subjects are focused at about 1.2 m or more.
- When the zoom magnification is 1×, this unit can focus on a subject approx. 4 cm away from the lens.
- The zoom speed does not vary when operating with the adjust zoom buttons and the remote control.
Optical image stabilizer function

Optical image stabilizer can stabilize the image without decreasing the image quality as much.

◊ Change the mode to [ ] or [ ].

Optical image stabilizer button
Pressing the button changes the optical image stabilizer setting.
(Motion picture recording mode)
[ ] → [ ] → OFF
(Still picture recording mode)
[ ] → [ ] → OFF

• Switch to manual mode before setting the Optical Image Stabilizer function to off.

[ ]: Active mode
This setting gives more stabilization and is suitable for recording when walking.

[ ]: ON
This setting is suitable for recording in a stable state such as scenery. We recommend recording with a tripod in motion picture recording mode.

■ Changing the optical image stabilizer function when in still picture recording mode

[ ] : [RECORD SETUP] → [O.I.S.] → [MODE1] or [MODE2]

[MODE1]:
The function works all the time.

[MODE2]:
The function works when the [ ] button is pressed. We recommend you are recording yourself or recording with a tripod in still picture recording mode.
• When in [MODE1], [ ] appears. When in [MODE2], [ ] appears.
• Stabilization may not be possible under strong shaking conditions.
Deleting scenes/still pictures

Deleted scenes/still pictures cannot be restored, so perform appropriate confirmation of the contents before proceeding with deletion.

Change the mode to .

Deleting multiple scenes/still pictures from the thumbnail display

1 Press the button while the thumbnail view screen is displayed.

2 Touch [ALL SCENES] or [SELECT].
   • When [ALL SCENES] is selected, all the scenes or still pictures on the selected media will be deleted.
     (In case of playing back scenes or still pictures by date, all the scenes or still pictures on the selected date will be deleted.)
   • Protected scenes/still pictures cannot be deleted.

3 (Only when [SELECT] is selected in step 2)
   Touch the scene/still picture to be deleted.
   • When touched, the scene/still picture is selected and the indication appears on the thumbnails. Touch the scene/still picture again to cancel the operation.
   • Up to 99 scenes can be selected to be deleted.

4 (Only when [SELECT] is selected in step 2)
   Touch [Delete] or press the button.
   • To continuously delete other scenes/still pictures, repeat steps 3-4

When you stop deleting halfway
Touch [CANCEL] or press the MENU button while deleting.
• The scenes or still pictures that have already been deleted when the deletion is cancelled cannot be restored.

To complete editing
Press the MENU button.
Formatting

Please be aware that if a medium is formatted, then all the data recorded on the medium will be erased and cannot be restored. Back up important data on a PC, DVD disc etc.

Select the menu. (⇒ 30)

[HDC-SD700]

MENU: [SETUP] → [FORMAT CARD]

[HDC-TM700]

MENU: [SETUP] → [FORMAT MEDIA] → [SD CARD] or [Built-inMemory]

[HDC-HS700]

MENU: [SETUP] → [FORMAT MEDIA] → [SD CARD] or [HDD]

• When formatting is complete, touch [EXIT] to exit the message screen.
• Perform a physical formatting of the SD card when the SD card is to be disposed/ transferred. (Refer to the Operation Instructions (PDF format))

[HDC-TM700] / [HDC-HS700]

Perform a physical formatting of the built-in memory/HDD when this unit is to be disposed/ transferred. (Refer to the Operation Instructions (PDF format))

• Do not turn this unit off or remove the SD card, while formatting. Do not expose the unit to vibrations or shock.

Use this unit to format media.
Formatting built-in memory or HDD is only available with this unit. Do not format an SD card using any other equipment such as a PC. The card may not be used on this unit.
Watching Video/Pictures on your TV

Confirm the terminals on your TV and use a cable compatible with the terminals. Image quality may vary with the connected terminals.

1. High quality
2. HDMI terminal
3. Component terminal
4. Video terminal

- Use the supplied AV multi cable. Check the output settings when connecting the component terminal or the video terminal with the AV multi cable.
- Use of the following Panasonic HDMI mini cables is recommended to connect the unit to the HDMI terminal.
- HDMI is the interface for digital devices. If you connect this unit to a HDMI compatible high definition TV and then play back the recorded high definition images, you can enjoy them in high resolution with high quality sound.

1 Connect this unit to a TV.

- Be sure to connect to the HDMI terminal.
- AV multi cable (supplied)

Picture quality
1. High definition images when connecting to HDMI terminal
2. High definition images when connecting to component terminal compatible with 1080i
3. Standard images when connecting to component terminal compatible with 576i
4. Standard images when connecting to video terminal
• Check that the plugs are inserted as far as they go.
• Do not use any other cables except a genuine Panasonic HDMI mini cable (RP-CDHM15, RP-CDHM30; optional).
• Do not use any other AV multi cables except the supplied one.
• When connecting to the component terminal of the TV, the yellow plug of the AV multi cable is not required.
• When connecting to the AV terminal of the TV, the component plug of the AV multi cable is not required.

2 Select the video input on the TV.
• Example:
  Select the [HDMI] channel with a HDMI mini cable.
  Select the [Component] or [Video 2] channel with an AV multi cable.
  (The name of the channel may differ depending on the connected TV.)
• Check the input setting (input switch) and the audio input setting on the TV. (For more information, please read the operating instructions for the TV.)

3 Change the mode to \( \Rightarrow \) to play back.

Reading the Operating Instructions (PDF format)

- You have practised the basic operations introduced in these operating instructions and want to progress to advanced operations.
- You want to check the Troubleshooting.

In these kinds of situations refer to Operating Instructions (PDF format) recorded on the CD-ROM containing the Operating Instructions (supplied).

For Windows

1. Turn the PC on and insert the CD-ROM containing the Operating Instructions (supplied).
2. Select the desired language and then click [Operating Instructions] to install.
   (Example: When an English language OS)

3. Double click the “SD700_TM700_HS700 Operating Instructions” shortcut icon on the desktop.

To uninstall the Operating Instructions (PDF format)
Delete the PDF file from the “Program Files\Panasonic\HDC” folder.
- When the contents in the Program Files folder cannot be displayed, click the [Show the contents of this folder] to display them.

For Mac

1. Turn the PC on and insert the CD-ROM containing the Operating Instructions (supplied).
2. Open the “Manual” folder in “VFF0613” and then copy the PDF file with the desired language inside the folder.

3. Double click the PDF file to open it.

Download and install a version of Adobe Reader that you can use with your OS from the following Web Site.
http://get.adobe.com/reader/otherversions

If using the following OS
- Windows 2000 SP4
- Windows XP SP2/SP3
- Windows Vista SP1/SP2
- Windows 7

Insert the CD-ROM containing the Operating Instructions (supplied), click [Adobe(R) Reader(R)] and then follow the messages on the screen to install.

When the Operating Instructions (PDF format) will not open
You will need Adobe Acrobat Reader 4.0 or later or Adobe Reader 6.0 or later to browse or print the Operating Instructions (PDF format).

If using the following OS
- Windows 2000 SP4
- Windows XP SP2/SP3
- Windows Vista SP1/SP2
- Windows 7

Insert the CD-ROM containing the Operating Instructions (supplied), click [Adobe(R) Reader(R)] and then follow the messages on the screen to install.

To uninstall the Operating Instructions (PDF format)
Delete the PDF file from the “Program Files\Panasonic\HDC” folder.
- When the contents in the Program Files folder cannot be displayed, click the [Show the contents of this folder] to display them.

For Mac

1. Turn the PC on and insert the CD-ROM containing the Operating Instructions (supplied).
2. Open the “Manual” folder in “VFF0613” and then copy the PDF file with the desired language inside the folder.

3. Double click the PDF file to open it.

Download and install a version of Adobe Reader that you can use with your OS from the following Web Site.
http://get.adobe.com/reader/otherversions

If using the following OS
- Windows 2000 SP4
- Windows XP SP2/SP3
- Windows Vista SP1/SP2
- Windows 7

Download and install a version of Adobe Reader that you can use with your OS from the following Web Site.
